Absent with Apologies:	Mohammad Alrobaian.

Agenda Items		
Goal	Specifics	Time
Recap	Abdullah alhabib gave a quick summary of everyone's division and job.	2min
Requirement specification	The requirements division has made sure all the requirements were feasible, and adjusted the user stories into requirement definitions, then made requirement specifications out of said definitions.	2min
How to proceed with requirement engineering	We are going to proceed for the moment with finding functional and non-functional requirements, then discuss further development afterwards.	2min
Modeling	The modeling team will start with the UML class diagram for the before mentioned requirement specification, so as to allow the implementation team to start, we have also agreed to use Lucid Chart for modeling.	3min
Implementation	Implementation will start after the UML class diagram is finished	2min
Q&A	Some concerns with technical issues were answered and discussed by the group.	3min
